### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-6 are rejected under 35 U.S.C. 102(b) as being anticipated by Fox (US 4,392,338).

Fox discloses manufacturing packets comprising removing one blank from a stack A and folding/assembling the packet after inserting a product; see figure 5. The blank has an arcuate free end 13, base wall 21, top wall 11, rear wall 20, front wall 22, side walls 24. First and second tabs 23 are foldably attached to rear wall 20 at opposite edges. Third and fourth tabs 24 are attached to front wall 22 at opposite edges. Tabs/flaps are moved inwardly and a food product is inserted before closing the package; see column 5, lines 42 – 63. Locking flap 13 is moved towards closure flap 12 to an interior of the package.

### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Alternatively, Claim 6 is rejected under 35 U.S.C. 103(a) as being unpatentable over Fox (US 4,392,338) in view of Torrenteras et al. (US 4,364,217).

Fox as described above discloses a method of forming a container from a folded blank, however does not disclose placing the blanks after a folded step into a stacked condition other than a hinge line see column 2, lines 21-24. Torrenteras et al. teach folding blanks into a flat, folded condition into a stack and then erecting the folded blanks. Therefore it would have been obvious to one of ordinary skill in the art to impart folds/deformations to blanks and place them in a stack before erecting/folding portions of the blanks as taught by Torrenteras et al. in the invention of Fox in order to prevent misalignment.

#### ***Response to Arguments***

4. Applicant's arguments filed 2/13/03 have been fully considered but they are not persuasive. The limitation of "placing said plurality of folded, flat, unitary blanks" does not impart a method step of performing a folding operation. Method steps need to be positively recited. Furthermore, Fox '338 describes "hinged" lid blanks as applicant recognizes in page 2 of the remarks filed 2/13/03; see also column 2, lines 21-24 "The packet is made from the single cardboard blank shown in FIG. 2, and comprises essentially a lid L integrally hinged along a line H to a body B." The hinged line of the blank is considered a "folded" portion of the blanks, which are formed/cut and then stacked at station A.

***Conclusion***

5. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.

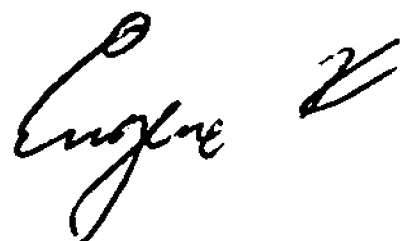

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Christopher R Harmon whose telephone number is 703-308-8643. The examiner can normally be reached on Monday-Thursday from 8-6.
